Tools & Technical Skills

Technical Expertise

- Machine Learning & Predictive Analytics: Predictive Modeling, Time-Series Forecasting (ARIMA, ANN, LSTM), Classification, Regression, XGBoost, Random Forest, Feature Engineering, Statistical Validation (Mann-Kendall, SPI).
 - Generative AI & Agentic Orchestration: Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), LangChain, LangGraph, Prompt Engineering, Semantic Search, Agentic Workflows.
 - Core Analytics & Data Systems: Advanced SQL, Python (Pandas, NumPy, PySpark), Data Pipeline Automation, FastAPI, RESTful APIs, Git, Cloud Fundamentals (AWS/Azure).
 - Model Governance & MLOps: Responsible AI, Data Sanitization, Input/Output Guardrails, Model Monitoring & Telemetry, Statistical Testing, Model Risk Management.
-

Experience & Project

Project Engineer | ANJ Turnkey Projects Pvt.Ltd. |

June 2025 – Present

- Design, develop, test, and deploy robust AI and Generative AI solutions that improve customer experience, operational efficiency, and business decision-making.
- Build and deploy production-grade workflows, applications, and data pipelines using Python, SQL, relational databases, and modern AI tools.
- Perform advanced exploratory analysis and feature engineering across structured and unstructured datasets to support scalable AI and Generative AI use cases.
- Develop and scale Retrieval-Augmented Generation pipelines and integrate agentic AI frameworks for multi-step reasoning and workflow automation.
- Predictive Analytics & Decision Support: Developed analytical models to perform resource optimization and trend forecasting across major commercial project.
- Model Deployment & Microservices: Containerized machine learning workflows using Docker and deployed, ensuring high-availability execution and real-time data access.
- Data Governance & Security: Implemented role-based access controls and data sanitization routines across backend systems to enforce strict data privacy and governance standards.
- Implement AI observability and MLOps practices to monitor model behaviour and system reliability; collaborate with cross-functional teams and communicate findings, risks, and recommendations to stakeholders.

Student: M.Tech (NIT Jaipur)

July 2023 – May 2025

Rainfall Trend Analysis, Drought Risk Modelling, and Forecasting

Institute: NIT Jaipur | **Guide:** Prof. Mahendra Chaudhary & Dr. Uttam Singh

Location: 11 Districts across Jaipur & Jodhpur Divisions, Rajasthan, India

Tools & Technologies: Python (Pandas, NumPy, SciPy, Scikit-learn, Statsmodels, Matplotlib), Excel, IMD Rainfall Data

Phase 1: Rainfall Trend Analysis (Jan 2024 – June 2024)

- Analyzed 41 years (1980–2020) of daily rainfall data from IMD, aggregated to monthly, seasonal, half-yearly, and annual scales.

Phase 2: Drought Risk Analysis (July 2024 – Dec 2024)

- Computed Standardized Precipitation Index (SPI) at multiple temporal scales (SPI-3, SPI-6, SPI-9, SPI-12, SPI-18) for all districts.

Phase 3: Rainfall Forecasting (Jan 2025 – May 2025)

- Built and validated time series forecasting models (ARIMA and ANN) using rainfall data from 1980–2012 for training and 2013–2020 for validation.

Data Science Trainee: Physics Wallah (iNeuron.ai) [Data science master]

Dec 2022 – Dec 2023

- Led end-to-end data science projects from ideation to deployment, ensuring timely and effective delivery.
- Built and optimized machine learning models, including RNNs and deep learning frameworks, for real-world problem-solving.
- Developed computer vision systems for image classification and recognition, improving accuracy and efficiency.
- Created interactive dashboards using Tableau, communicating insights clearly to stakeholders.
- Streamlined data pipelines to enhance processing speed and reduce computational overhead.

Project: Delivered (2022-2024)

- 1. DIAMOND PRICE PREDICTION (Regression)
- 2. Predicting Concrete Strength Using Machine Learning (Supervised Classification)
- 3. OBJECT DETECTION (YOLO, Kalman filter, Deepsort)
- 4. Developed an intelligent Telegram bot using OpenAI's ChatGPT (LLM, ChatBot, OpenAI)
- 5. Telecom Customer Churn Analysis (Power BI)
- 6. Agentic Social Media Automation Engine (n8n)

Publications / Research Papers

- *Integrated trend analysis and meteorological drought forecasting using ANN in the adjacent semi-arid and arid regions*
Status: Submitted to *Theoretical and Applied Climatology* (**Springer Nature**).

Certifications

1. Data Science Master (iNeuron. AI) PW

Covered topics: Python, Machine Learning, Deep Learning, NLP, Big Data, Apache Spark, Tableau, Power BI

2. GATE 2023 Qualified

3. NIT Jaipur (M.Tech - 7.85 CGPA)

EDUCATION

M.Tech | Malaviya National Institute of Technology (MNIT), Jaipur (2023 – 2025)

B.Tech | Chandigarh University (2016 – 2020)
